## **LOOKING FOR A TALENTED INDIVIDUAL TO JOIN OUR TEAM**

Henriquez Partners Architects is dedicated to working closely with clients to create buildings that are culturally, economically and environmentally sustainable. It is our view that every project is an opportunity to enrich local communities by seamlessly integrating ethics and aesthetics. Informed by this credo and by an unwavering commitment to design integrity, we have consistently demonstrated the ability to manage projects from design through to construction, and the technical expertise to create structures that stand the test of time. Our buildings have received several awards for design excellence, including the Governor General's Medal in Architecture for the Lore Krill Housing Coop, the Trent Environmental Sciences Building, and the Sinclair Centre Federal Office Complex.

We excel at large and complex mixed-use projects, such as the 1 million square foot TELUS Garden mixed-use development, Woodward's redevelopment, and most recently the Mirvish Village site at Bloor and Bathurst in Toronto. It is our philosophy that no building is too small if it contributes to society in a meaningful way as result, our portfolio also features an array of smaller, unique civic structures.

We are seeking talented individuals to help complement our existing team.

### **JUNIOR ARCHITECT / MODEL MAKER**

Henriquez Partners uses built models throughout the design process as a design, visualization and presentation tool. We require an architectural graduate with minimum 2-4 years of experience with exacting craftsmanship, who performs well independently. Applicant must work independently, as part of a design team and must be natural leaders accountable for their work.

#### **THE SUCCESSFUL CANDIDATE WILL:**

- Have practical experience creating massing, study and presentation models
- Have experience with a laser cutter, including preparing files and operating a laser cutter
- Be able to quickly create massing and study models
- Have experience with 3D printing and other current model-making techniques
- Have the ability to construct quality architectural context models
- Have experience working with a range of materials in the production of physical models (chip board, acrylic, foam core, wood etc.)
- Have patience, dedication and strong attention to detail
- The ability to work to tight deadlines
- Have good communication skills
- Have exemplary design skills.
- Be able to take direction from the architectural and visualization teams
- Have SketchUp, Vectorworks, Rhino and 3D Studio Max (asset)
- Have Adobe InDesign, Photoshop, and Illustrator skills (asset)
- Have experience in creating photo-realistic or highly detailed conceptual renderings (asset).

Please submit cover letter, resume and portfolio to the attention of:  
Andrea Smith, Finance and HR Administrator
